AISiCal meeting during COVID19

Since the outbreak of the coronavirus in Europe, homeworking increased rapidly and digital meetings are becoming the new way of keeping contact with your colleagues. While some functions are vital and require a physical presence, many activities can be performed online from your home office.

The AISiCal project has also experienced this change of working habits and environment. The planned consortium meeting switched from Athens to the home offices of the partners and all discussions are taking place online, via email, chat or other digital platform. The impact of the coronavirus is enormous, but people are coping with it more and more. Switching your role as a teacher, parent, colleague or partner is difficult and requires a lot of flexibility and creativity. In this article, we will show how the partners of the AISiCal are doing this!

Homeworking and meetings during COVID19

Bauxite waste management

As the AISiCal project focuses on creating a more sustainable alumina production, it is necessary to know not only how alumina is made, but also what kind of waste is generated during its production. In this article we dive into the world of bauxite, its usage for alumina production and the waste handling that arises from this process.

Upcoming events

EUSEW | 22 - 26 June | Belgium

Past events

AISiCal joined forces with EASME during the PDAC Convention. Attendees were able to get our brochure and learn more about our program to achieve a greener and more sustainable mining industry.

In March AISiCal was part of the conference "Green transition challenged by the metal supply chain" in Brussels. Different EU H2020 projects and other partners came together to discuss the challenges from different perspectives.

[Visit our website for more insight regarding the project](#)

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 820911.
